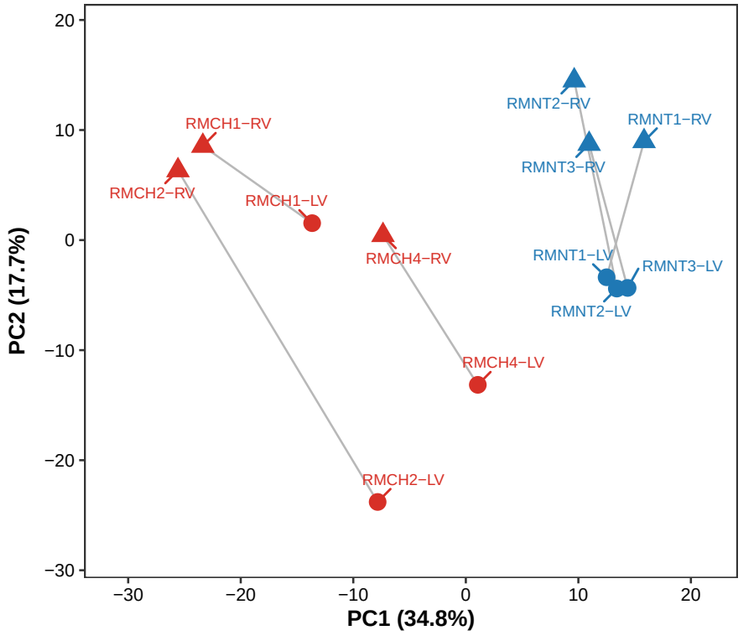
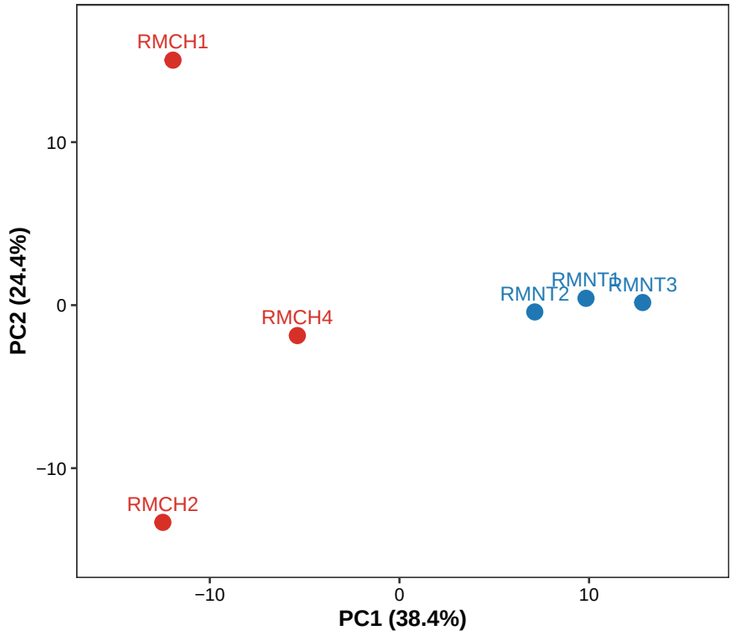
A

Paired LV/RV samples: six rats, twelve tissues



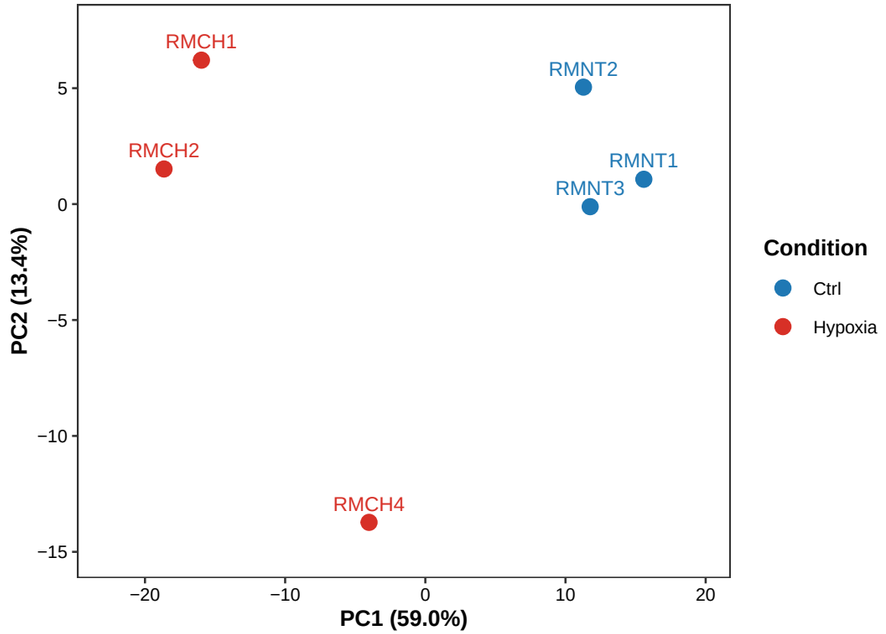
B

LV: three rats per condition



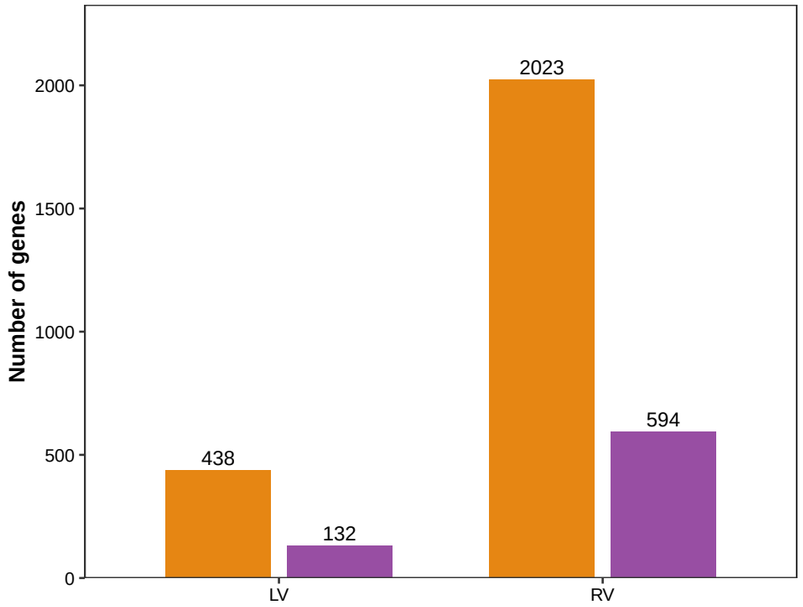
C

RV: three rats per condition



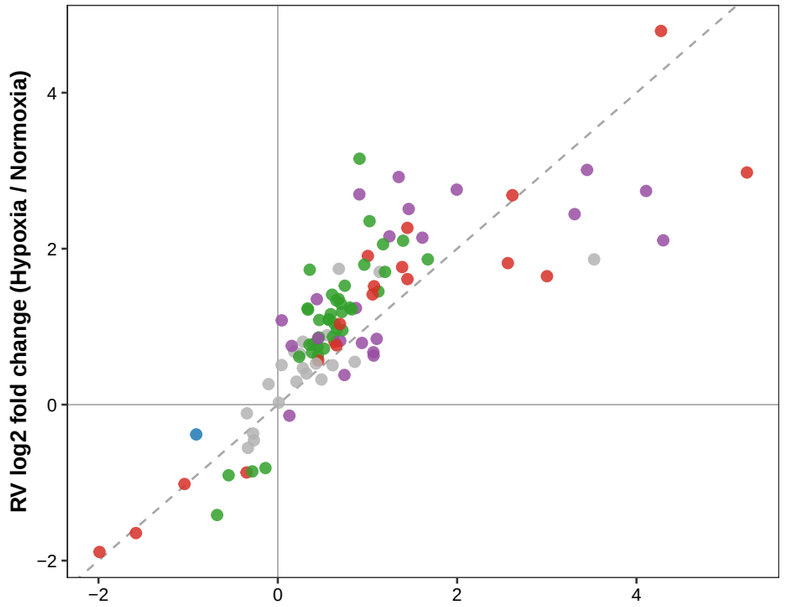
D

Transcriptome−wide differential expression



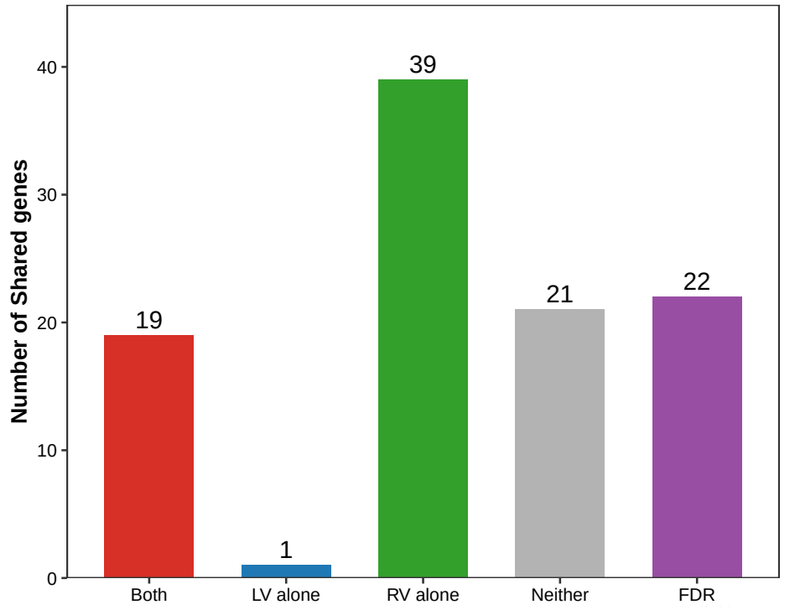
E

Discovery Shared: n = 102; Spearman rho = 0.85



F

FDR < 0.05 + discovery direction; no FC cutoff



FDR < 0.05

FDR < 0.05 and |log2FC| >= 1

FDR < 0.05 + discovery direction

Significant in both

Significant in LV alone

Significant in RV alone

Neither significant

FDR unavailable
